Be seen, Be safe. Reflective wear for Horse and Rider

Riding a horse on the road in any weather conditions has its risks. Primarily, other road users and particularly those with a few more horse power than yourself. Every rider hopes that drivers are attentive and act in the appropriate way when passing a horse and rider. Using high visibility clothing in poor light conditions will alert a driver to your presence earlier and hopefully encourage them to pass slowly and safely.

In order to create a high visibility garment Original Buff® SA Buff® have adapted their incredibly useful Original Buff® to incorporate two 3M Scotchlite™ retro reflective material strips to make Reflective Buff®. Whilst offering its user visibility to others in the dark and helping to reduce accident risk, Reflective Buff® will appear brilliant white when illuminated by another light source.

In addition, Reflective Buff® maintains all characteristics of Original Buff® headwear; multifunctional, seam-free, non fade or stretch, fast drying and highly breathable. Simply by twisting or folding a Buff® it's ways to wear will include; a neck scarf, face mask, balaclava, helmet liner, beanie, bandana or as many others as your imagination will allow.
